

MISSION & PHILOSOPHY

As Treatment Placement Specialists, our philosophy begins with an appreciation for the people with whom we work and our authentic wish to help them heal. We know that people seeking treatment undoubtedly feel lost in one way or another, uncertain about what the future holds and confused about where they should be looking for answers. Without having words to accurately describe what is wrong, many individuals feel hopeless in their search for solutions. Our mission is to help them get the best possible treatment experience that will fully address all of their concerns. We do this by asking the right questions so that we have the right information to find the most appropriate treatments.

WHO WE ARE

Acadia Recovery Division's national team of Treatment Placement Specialists (TPS) is comprised of incredibly compassionate professionals with a diverse collection of healthcare experience. We understand that the search for appropriate behavioral health treatment is often confusing and frustrating. Our knowledge and experience helps us identify treatment needs, assists us in determining the most appropriate treatment options, and guides clients towards quickly accessing treatment. By working with our team, clients benefit from an enhanced treatment experience. We deliver pre-treatment consultation services in an effort to improve overall treatment outcomes.

POPULATION SERVED

Our Treatment Placement Specialists work with individuals who are experiencing any number of issues that can be captured under the umbrella of behavioral health. We have programs that accommodate a range of financial and insurance needs. If, for any reason, we do not have an optimal program for a client, we will provide recommendations outside of our network. Some of the many conditions our programs treat and services they provide include:

- Substance Abuse & Addictions
- Mood & Anxiety Disorders
- Trauma-Related Disorders
- Eating Disorders
- Medical Stabilization
- Residential Care & Medical Detox
- Neuropsychological Testing
- Outdoor Adventure-Based Treatment

WHAT WE OFFER

We work as advisors to ensure that each individual finds the right program that will meet his or her needs. As part of the comprehensive services we offer, we serve clients by doing the following:

- Consider all available information, offering education leading to informed decisions
- Offer individualized guidance to referring professionals and their clients to best meet their treatment needs
- Facilitate care coordination by directly connecting clients to facility treatment teams
- Synchronize continuing care resources post-treatment for successful reintegration and lasting outcomes
